## Objective

Full-Stack Software Developer student seeking a full-time entry level position in order to apply the knowledge so far acquired and get hands-on experience starting May 2021.

## Education

- UNCC (University of North Carolina at Charlotte) BootCamp  
Charlotte, NC. Full-Stack Software Developer Expected Graduation date: April 2021
- Instituto Superior Politecnico Jose Antonio Echeverría (ISPJAE)  
Habana, Cuba. B.S – Telecommunications and Electronics Engineering Graduation: July 2017

## Projects

- This repository ("covid-correlation-console") is a collaborative project that uses HTML, CSS, and JavaScript to create a console where a user can see accurate COVID-19 statistics. Our site is a tool to get statistics both for the United States and Internationally. URL: <https://smoyamendez.github.io/covid-correlation-console/>.
- This is a simple calendar application that allows the user to save events for each business hour day. This app will run in the browser and feature dynamically HTML, CSS and jQuery. The application contains a work day of 9AM – 5PM, and has areas for entering notes to help the user keep track of their busy schedule. The top of the planner always contains the current date, without the user having to look that up. URL: <https://lauracejas.github.io/Work-Day-Scheduler/>.
